INDEX TO VOLUME 117

Alphabetical Table of Contents of Authors

AITCHISON, STEWART. See O. J. REICHMAN

ALATALO, RAUNO V., ALLAN CARLSON, ARNE LUNDBERG, and STAFFAN ULFSTRAND. The conflict between male polygamy and female monogamy: the case of the pied flycatcher *Ficedula hypoleuca*, 738

ANDERSON, G. R. V., A. H. EHRLICH, P. R. EHRLICH, J. D. ROUGHGARDEN, B. C. RUSSELL, and F. H. TALBOT. The community structure of coral reef fishes, 476.

AUBLE, GREGOR T. See BERNARD C. PATTEN

AXELROD, DANIEL I. Holocene climatic changes in relation to vegetation disjunction and speciation, 867

BAKER, WILLIAM K., and ELIZABETH ANN KAEDING. Linkage disequilibrium at the alpha-esterase loci in a population of *Drosophila montana* from Utah, 804

BALLINGER, ROYCE E. Can predator defense be tributive or toxins nontoxic? 794

BANYIKWA, F. F. See BRIAN G. WILLIAMS

BARCLAY, HUGH J., and PATRICK T. GREGORY. An experimental test of models predicting life-history characteristics, 944

BARNARD, DEBRA E. See ROBERT G. JAEGER

BARR, THOMAS C., JR., and PHILIP H. CROWLEY. Do cave carabid beetles really show character displacement in body size? 363

BELL, MICHAEL A., and KATHLEEN E. RICHKIND. Clinal variation of lateral plates in threespine stickleback fish, 113

BERGDAHL, JAS. C. See DAVID F. RHOADES

BERNSTEIN, HARRIS, GREGORY S. BYERS, and RICHARD E. MICHOD. Evolution of sexual reproduction: importance of DNA repair, complementation, and variation, 537

BERTNESS, MARK D. Pattern and plasticity in tropical hermit crab growth and reproduction, 754

BIERZYCHUDEK, PAULETTE. Pollinator limitation of plant reproductive effort, 838

BLAUSTEIN, ANDREW R. Sexual selection and mammalian olfaction, 1006

BOGGS, CAROL L. Nutritional and life-history determinants of resource allocation in holometabolous insects, 692

BOTSFORD, LOUIS W. The effects of increased individual growth rates on depressed population size, 38

BRENCHLEY, G. A. A reply to Thomas and Pomerantz with a note on diffuse competition, 386

BRÜCKNER, D. See R. H. CROZIER

BULL, J. J. See ERIC L. CHARNOV

BURGER, JOANNA. On becoming independent in herring gulls: parent-young conflict, 444

BURGER, JOANNA. Sexual differences in parental activities of breeding black skimmers, 975

BURLEY, NANCY. Mate choice by multiple criteria in a monogamous species, 515

BYERS, GREGORY S. See HARRIS BERNSTEIN

CAMPBELL, ALLAN M. Regulation of micronutrilite synthesis, 998

CAMPBELL, R. B. See SAMUEL KARLIN

CANT, JOHN G. H. Hypothesis for the evolution of human breasts and buttocks, 199

CARLSON, ALLAN. See RAUNO V. ALATALO

Alphabetical Table of Contents of Titles

Adaptive significance of toxic nectar. David F. Rhoades and Jas. C. Bergdahl, 798
All-female litters as a reproductive strategy: defense and generalization of the Trivers-Willard hypothesis. Lauri Oksanen, 109
Application of the Kence-Bryant model of mating behavior to a natural population of soldier beetles. David E. McCauley, 400

Birds as inefficient predators on terrestrial salamanders. Robert G. Jaeger, 835
The broken-stick model: a common misunderstanding. E. C. Pielou, 609

Can predator defense be tributive or toxins nontoxic? Royce E. Ballinger, 794
Clinal variation of lateral plates in threespine stickleback, fish. Michael A. Bell and Kathleen E. Richkind, 113
Clinical variations in male genitalia in *Drosophila teissieri* Tsacas. D. Lachaise, F. Lemeunier, and M. Veuille, 600
The coincidence of mimicries and other misleading coincidences. M. Moynihan, 372
Colonizing abilities, island size, and the number of species on archipelagoes. Blaine J. Cole, 629
Comments on Abrams' test of Pianka's niche overlap hypothesis. Brian G. Williams and F. F. Banyikwa, 774
The community structure of coral reef fishes. G. R. V. Anderson, A. H. Ehrlich, P. R. Ehrlich, J. D. Roughgarden, B. C. Russell, and F. H. Talbot, 476
The conflict between male polygamy and female monogamy: the case of the pied flycatcher *Ficedula hypoleuca*. Rauno V. Alatalo, Allan Carlson, Arne Lundberg, and Staffan Ulfstrand, 738
The consequences of being territorial: spiders, a case study. Susan E. Riechert, 871
Coral bioerosion: damage relative to skeletal density. Raymond C. Highsmith, 193
Criteria for ascertaining the existence of host races. John Jaenike, 830
The cybernetic nature of ecosystems. S. J. McNaughton and Michael B. Coughenour, 985

Dear enemy recognition and the costs of aggression between salamanders. Robert G. Jaeger, 962
Do cave carabid beetles really show character displacement in body size? Thomas C. Barr, Jr. and Philip H. Crowley, 363
Does the "sexy son" hypothesis apply to mate choice in red-winged blackbirds? William A. Searcy and Ken Yasukawa, 343
Do "higher order interactions" in competition systems really exist? Mark J. Pomerantz, 583
The dynamics of multiparasitoid-host interactions. Robert M. May and Michael P. Hassell, 234

Early leaf abscission: a neglected source of mortality for folivores. Stanley H. Faeth, Edward F. Connor, and Daniel Simberloff, 409
Ecology and evolution of physiological time in insects. Fritz Taylor, 1
The effects of increased individual growth rates on depressed population size. Louis W. Botsford, 38
Elaiosomes and fleshy fruits: pheology and selection pressures for antidispersed seeds. John N. Thompson, 104
Environmental variability promotes coexistence in lottery competitive systems. Peter L. Chesson and Robert R. Warner, 923
Ethanol utilization: threshold differences among three *Drosophila* species. Peter A. Parsons and G. E. Spence, 568

The evolution of "mixed" life histories in marine invertebrates and elsewhere. Hal Caswell, 529
Evolution of sexual reproduction: importance of DNA repair, complementation, and variation. Harris Bernstein, Gregory S. Byers, and Richard E. Michod, 537
The existence of a protected polymorphism under conditions of soft as opposed to hard selection in a multideme population system. Samuel Karlin and R. B. Campbell, 262
An experimental test of models predicting life-history characteristics. Hugh J. Barclay and Patrick T. Gregory, 944
Extinction-mediated competition: the *Anolis* lizards and insectivorous birds of the West Indies. S. Joseph Wright, 181

The fallacy of the averages in ecological optimization theory. Alan R. Templeton and Lawrence R. Lawlor, 390
Feasibility and stability in community dynamics. William R. Thomas and Mark J. Pomerantz, 381
Fitness, reproductive value, age structure, and the optimization of life-history patterns. Robert E. Ricklefs, 819
Food choice and digestive strategies of two sympatric primate species. Katharine Milton, 496
Foraging tactics of a terrestrial salamander: choice of diet in structurally simple environments. Robert G. Jaeger and Debra E. Barnard, 639
A further note on community models. John Vandermeer, 379

Gene differences between human races. Masatoshi Nei, 88
Genetic basis for repeated mating in *Drosophila melanogaster*. Donald W. Pyle and Mark H. Gromko, 133
Genetic evidence for long-term monogamy in a small rodent, *Peromyscus polionotus*. David W. Foltz, 665
Genetic relatedness and the social organization of *Polistes* colonies. L. J. Lester and R. K. Selander, 147
Gestalt perception by birds as individuals and in flocks. Robert Craig Sargent and John R. G. Turner, 99

Herbovire pests, habitat islands, and the species-area relation. Jorge R. Rey, Earl D. McCoy, and Donald R. Strong, Jr., 611
Holocene climatic changes in relation to vegetation disjunction and speciation. Daniel I. Axelrod, 867
Hypothesis for the evolution of human breasts and buttocks. John G. H. Cant, 199

Implications of sex for the analysis of life histories. Donald M. Waller and Douglas Green, 810
In defense of ecosystems. Robert L. Knight and Dennis P. Swaney, 991
In defense of the "sexy son" hypothesis. Patrick J. Weatherhead and Raleigh H. Robertson, 349
Insular biogeography of vernal pools in the Central Valley of California. Robert F. Holland and Subodh K. Jain, 24

Leaf size and leaf temperature in tropical vines. Ned Fetcher, 1011
Linkage disequilibrium at the alpha-esterase loci in a population of *Drosophila montana* from Utah. William K. Baker and Elizabeth Ann Kaeding, 804

Tests of some predictions from MacArthur-Levins competition models: a critique. Andrew Sih and John Dixon, 550
Tropical rain forests: Are nutrients really critical? Carl F. Jordan and Rafael Herrera, 167

Variation in age and size at maturity of the slider turtle (*Pseudemys scripta*). J. Whitfield Gibbons, Raymond D. Semlitsch, Judith L. Greene, and Joseph P. Schubauer, 841
Variation in propagule size as a function of environmental uncertainty for tree frogs. Martha L. Crump, 724

Why there are no ant slave rebellions. Douglas E. Gladstone, 779
Will a sexual population evolve to an EES? J. Maynard Smith, 1015

Yeast, ethanol, and chemical competition. William Louis Culberson and Chicita F. Culberson, 567

INDEX TO VOLUME 118

Alphabetical Table of Contents of Authors

ABRAHAM, KENNETH F. See THOMAS D. NUDDS
ABRAMS, PETER A. Comparing randomly constructed and real communities: a comment, 776
ANKNEY, C. DAVISON. See THOMAS D. NUDDS
ARMESTO, JUAN J., and LUIS C. CONTRERAS. Saxicolous lichen communities: nonequilibrium systems? 597
ARRUDA, JOSEPH. See LAURI OKSANEN
ATSATT, PETER R. Lycaenid butterflies and ants: selection for enemy-free space, 638

BARRETT, SPENCER C. H. See JAMES D. THOMSON
BEACH, JAMES H. Pollinator foraging and the evolution of dioecy, 572
BENDER, EDWARD A. See TED J. CASE
BERTNESS, MARK D. Conflicting advantages in resource utilization: the hermit crab housing dilemma, 432
BIRCH, DOUGLASS W. Dominance in marine ecosystems, 262
BRAHMACHARY, R. L., and J. DUTTA. On the pheromones of tigers: experiments and theory, 561
BROWN, JERRAM L. See PEPPER W. TRAIL
BURGER, JOANNA. Super territories: a comment, 578
BURKY, A. J. See M. J. MCLEOD

CALLAHAN, J. R. Vocal solicitation and parental investment in female *Eutamias*, 872
CARPENTER, STEPHEN R. Submersed vegetation: an internal factor in lake ecosystem succession, 372
CARRIER, ROBERT H. See FRANK E. PERRON
CASE, TED J. Niche separation and resource scaling, 554
CASE, TED J., and EDWARD A. BENDER. Testing for higher order interactions, 920
CHAPMAN, ROBERT W. Recombination potentials and evolutionary rates, 384
CHEW, FRANCES S. Coexistence and local extinction in two pierid butterflies, 655
COLEMAN, ANNETTE W. The use of natural genetic markers to study colonization and sexuality in nature, 761
COLLIER, GEORGE. See LYNN W. KAUFMAN
CONNOR, EDWARD F. See DANIEL SIMBERLOFF
CONTRERAS, LUIS C. See JUAN J. ARMESTO
CROWLEY, PHILIP H. Dispersal and the stability of predator-prey interactions, 673

DAPPLES, CHARLES C. See ELIOT B. SPIESS
DEJIANNE, DENISE. See ANITA PRUZAN-HOTCHKISS
DILLON, ROBERT T. Patterns in the morphology and distribution of gastropods in Oneida Lake, New York, detected using computer-generated null hypotheses, 83
DUTTA, J. See R. L. BRAHMACHARY

EDSON, MICHAEL M., THEODORE C. FOIN, and CHARLES M. KNAPP. "Emergent properties" and ecological research, 593
EDWARDS, P. J. See S. D. WRATTEN
EISENBERG, JOHN F., and DON E. WILSON. Relative brain size and demographic strategies in didelphid marsupials, 1

FARO, SCOTT H. See ANITA PRUZAN-HOTCHKISS
FOGLEMAN, JAMES C., KENNETH R. HACKBARTH, and WILLIAM B. HEED. Behavioral differentiation between two species of cactophilic *Drosophila* III. Oviposition site preference, 541

FOIN, THEODORE C. See MICHAEL M. EDSON
FRANK, PETER W. A condition for a sessile strategy, 288
FRETWELL, STEPHEN D. Bringing ecology to scientific maturity, 306
FRETWELL, STEPHEN D. See LAURI OKSANEN

GETTY, THOMAS. Competitive collusion; the preemption of competition during the sequential establishment of territories, 426
GILPIN, MICHAEL E. Peninsular diversity patterns, 291
GODDARD, P. See S. D. WRATTEN
GOWATY, PATRICIA ADAIR. An extension of the Orians-Verner-Willson model to account for mating systems besides polygyny, 851
GRACE, JAMES B., and ROBERT G. WETZEL. Habitat partitioning and competitive displacement in cattails (*Typha*): experimental field studies, 463
GUTSCHICK, VINCENT P. Evolved strategies in nitrogen acquisition by plants, 607
GUTTMAN, S. I. See M. J. MCLEOD

HACKBARTH, KENNETH R. See JAMES C. FOGLEMAN
HAY, MARK E. Herbivory, algal distribution, and the maintenance of between-habitat diversity on a tropical fringing reef, 520
HEED, WILLIAM B. See JAMES C. FOGLEMAN
HERRERA, CARLOS M. Are tropical fruits more rewarding to dispersers than temperate ones? 896
HÖGSTEDT, GÖRAN. Should there be a positive or negative correlation between survival of adults in a bird population and their clutch size? 568
HORNBACH, D. J. See M. J. MCLEOD

JACKSON, GEORGE A., and RICHARD R. STRATHMANN. Larval mortality from offshore mixing as a link between precompetent and competent periods of development, 16
JAEGER, ROBERT G. Dear enemy recognition and the costs of aggression between salamanders. (Erratum), 605
JENKINS, STEPHEN H. Common patterns in home range–body size relationships of birds and mammals, 126
JOLLIE, MALCOLM. Segment theory and the homologizing of cranial bones, 785
JORDAN, CARL F. Do ecosystems exist? 284

KAUFMAN, LYNN W., and GEORGE COLLIER. The economics of seed handling, 46

Alphabetical Table of Contents of Titles

Alarm duetting and pursuit deterrence in an African antelope. Ronald L. Tilson and Peter M. Norton, 455
Ambush predation as a destabilizing influence upon prey populations. Robert J. Taylor, 102
The American Society of Naturalists: Reports of the Treasurer and Editors for 1980, 783
Are size gaps in dabbling- and wading-bird arrays real? Thomas D. Nudds, Kenneth F. Abraham, C. Davison Ankney, and Paul D. Tebbel, 549
Are tropical fruits more rewarding to dispersers than temperate ones? Carlos M. Herrera, 896

Behavioral differentiation between two species of cactophilic *Drosophila* III. Oviposition site preference. James C. Fogleman, Kenneth R. Hackbarth, and William B. Heed, 541
Behavior of parasitized aposematic caterpillars: advantageous to the parasitoid or the host? Nancy E. Stamp, 715
Beyond selection: optimal ingestion rate as a function of food value. Gary L. Taghon, 202
Body size, genome size, and intrinsic rate of increase in ciliated Protozoa. William D. Taylor and Brian J. Shuter, 160
Bringing ecology to scientific maturity. Stephen D. Fretwell, 306
British trees and insects: the role of palatability. S. D. Wratten, P. Goddard, and P. J. Edwards, 916

Coexistence and local extinction in two pierid butterflies. Frances S. Chew, 655
Common patterns in home range–body size relationships of birds and mammals. Stephen H. Jenkins, 126
Community patterns and competition in folivorous insects. J. H. Lawton and D. R. Strong, Jr., 317
Comparing diversity indices based on counts weighted by biomass or other importance values. N. I. Lyons, 438
Comparing randomly constructed and real communities: a comment. Peter A. Abrams, 776
Competition and the structure of an avian foraging guild. Kurt A. Rusterholz, 173
Competitive collusion: the preemption of competition during the sequential establishment of territories. Thomas Getty, 426
A condition for a sessile strategy. Peter W. Frank, 288
Conflicting advantages in resource utilization: the hermit crab housing dilemma. Mark D. Bertness, 432
Constancy in the size ratios of sympatric species. V. Louise Roth, 394
A cost of increased early reproductive effort in the snail *Biomphalaria glabrata*. Dennis J. Minchella and Philip T. LoVerde, 876
The cybernetic nature of ecosystems. Bernard C. Patten and Eugene P. Odum, 886

The demographic consequences of two-stage life cycles: survivorship and the time of reproduction. Barbara A. Schaal and Wesley J. Leverich, 135
Dispersal and the stability of predator-prey interactions. Philip H. Crowley, 673
The distribution of altruism among kin: a mathematical model. Ronald M. Weigel, 191
Do ecosystems exist? Carl F. Jordan, 284
Does the theory of optimal diets apply in complex environments? Dolph Schluter, 139
Dominance in marine ecosystems. Douglass W. Birch, 262
The dynamics of the species-area relation in marine fouling systems: 1. Biological correlates of changes in the species-area slope. Amy Schoener and Thomas W. Schoener, 339

The economics of seed handling. Lynn W. Kaufman and George Collier, 46
Egg clustering and the southern hemisphere lycaenids: comments on a paper by N. E. Stamp. R. L. Kitching, 423
Egg size distributions among closely related marine invertebrate species: are they bimodal or unimodal? Frank E. Perron and Robert H. Carrier, 749
"Emergent properties" and ecological research. Michael M. Edson, Theodore C. Foin, and Charles M. Knapp, 593
Environmental heterogeneity, genetic polymorphism, and reproductive strategies. M. J. McLeod, D. J. Hornbach, S. I. Guttman, C. M. Way, and A. J. Burky, 129
Erratum. Dear enemy recognition and the costs of aggression between salamanders. Robert G. Jaeger, 605
Evolved strategies in nitrogen acquisition by plants. Vincent P. Gutschick, 607
Exploitation ecosystems in gradients of primary productivity. Lauri Oksanen, Stephen D. Fretwell, Joseph Arruda, and Pekka Niemelä, 240
An extension of the Orians-Verner-Willson model to account for mating systems besides polygyny. Patricia Adair Gowaty, 851

The facultative adjustment of sex ratio in lodgepole pine. Christopher C. Smith, 297
The "false head" hypothesis: predation and wing pattern variation of lycaenid butterflies. Robert K. Robbins, 770
Fitness and adaptedness of polymorphic and monomorphic populations of *Drosophila melanogaster*. Sergey Polivanov, 702
The fouling community at Beaufort, North Carolina: a study in stability. John P. Sutherland, 499

A general model of comparative fecundity for semelparous and iteroparous life histories. Truman P. Young, 27

Habitat partitioning and competitive displacement in cattails (*Typha*): experimental field studies. James B. Grace and Robert G. Wetzel, 463
Herbivory, algal distribution, and the maintenance of between-habitat diversity on a tropical fringing reef. Mark E. Hay, 520
How diversified seed germination behavior is selected. Mark Westoby, 882

Inclusive fitness and group size with a reconsideration of group sizes in lions and wolves. Peter S. Rodman, 275
Infanticide in relation to individual and flock histories in a communally breeding bird, the Mexican jay (*Aphelocoma ultramarina*). Pepper W. Trail, Stuart D. Strahl, and Jerram L. Brown, 72
Intra-archipelago vertebrate distributions: the slope of the species-area relation. S. Joseph Wright, 726

Larval mortality from offshore mixing as a link between precompetent and competent periods of development. George A. Jackson and Richard R. Strathmann, 16
The lawfulness of natural selection. Edward S. Reed, 61
Lycaenid butterflies and ants: selection for enemy-free space. Peter R. Atsatt, 638

Missing species combinations. Daniel Simberloff and Edward F. Connor, 215
A model of fly mating intensity, not behavior. Eliot B. Spiess and Charles C. Dapples, 307
A model of selection for facultative nonsymbiotic mutualism. Kathleen H. Keeler, 488

Niche separation and resource scaling. Ted J. Case, 554

On being the right size. Derek Roff, 405
On the pheromones of tigers: experiments and theory. R. L. Brahmachary and J. Dutta, 561
Optimal travel speeds of animals. Graham H. Pyke, 475

The partitioning of reproductive energy between ova and protective capsules in marine gastropods of the genus *Conus*. Frank E. Perron, 110

Patterns in the morphology and distribution of gastropods in Oneida Lake, New York, detected using computer-generated null hypotheses. Robert T. Dillon, 83
Peninsular diversity patterns. Michael E. Gilpin, 291
The place of the self-thinning rule in population dynamics. Mark Westoby, 581
Pollinator foraging and the evolution of dioecy. James H. Beach, 572
Predator errors, foraging in unpredictable environments, and risk: the consequences of prey variation in handling time versus net energy. A. Richard Palmer, 908
Pregnancy blocking in rodents: adaptive advantages for females. Jay B. Labov, 361
Prey selection by sight: random or economic? Virginia C. Maiorana, 450

Reciprocal altruism and spite in gulls: a comment. Edward C. Waltz, 588
Recombination potentials and evolutionary rates. Robert W. Chapman, 384
A reevaluation of the relationship between genome size and genetic variation. Allan Larson, 119
Relative brain size and demographic strategies in didelphid marsupials. John F. Eisenberg and Don E. Wilson, 1
Reproductive allocation in the Hawaiian Drosophildae: egg size and number. Jeremy R. Montague, Robert L. Mangan, and William T. Starmer, 865

Saxicolous lichen communities: nonequilibrium systems? Juan J. Armesto and Luis C. Contreras, 597
Seed size, life span, and germination date as coadapted features of plant life history. Jonathan W. Silvertown, 860
Segment theory and the homologizing of cranial bones. Malcolm Jollie, 785
Selection for outcrossing, sexual selection, and the evolution of dioecy in plants. James D. Thomson and Spencer C. H. Barrett, 443
Should there be a positive or negative correlation between survival of adults in a bird population and their clutch size? Göran Högstedt, 568
An *S*-locus model for the distyly supergene. Gayle Muenchow, 756
Song repertories and lifetime reproductive success in the great tit (*Parus major*). Peter K. McGregor, John R. Krebs, and Christopher M. Perrins, 149
Species-area slopes and coefficients: a caution on their interpretation. Thomas E. Martin, 823
Sperm utilization and once- and twice-mated *Drosophila pseudoobscura* females. Anita Pruzan-Hotchkiss, Denise DeJianne, and Scott H. Faro, 37
Submersed vegetation: an internal factor in lake ecosystem succession. Stephen R. Carpenter, 372
Super territories: a comment. Joanna Burger, 578

Temporary weight decrease in breeding birds may result in more fledged young. R. Åke Norberg, 838
Testing for higher order interactions. Ted J. Case and Edward A. Bender, 920
Time: a hidden dimension in the polygyny threshold model. James F. Wittenberger, 803

The use of natural genetic markers to study colonization and sexuality in nature. Annette W. Coleman, 761

Vocal solicitation and parental investment in female *Eutamias*. J. R. Callahan, 872

Why gametophytes and sporophytes are different: form and function in a terrestrial environment. P. A. Keddy, 452
